1 Introduction

This document will guide you to install Invisily Client on Ubuntu Desktop devices.

2 Requirements

Following are the hardware and software requirements:

2.1 Hardware

- Processor: Minimum 2+ GHz Dual Core x86
- Memory (RAM): 4 GB

2.2 Software

Supported Operating Systems:

- Ubuntu Desktop 18.x.x (64-bit)
- Ubuntu Desktop 20.x.x (64-bit)
- Ubuntu Desktop 22.x.x (64-bit)

3 Install

1. Extract the installer (**invisily_client.deb**) from the compressed ZIP file.
2. Open a terminal and run the following command to install it:

```
sudo apt install ./invisily_client.deb
```

4 Run

1. Open Application Dashboard/Show Applications and search “Invisily”. The Invisily Client’s shortcut will appear.
2. Enter your username and password and click on the LOGIN.
3. On successful login, the list of the assigned services will appear.

5 Uninstall

Open terminal and run the following command:

```
sudo apt purge invisily-client
```

6 Troubleshoot

The log files are maintained at this path:

```
/opt/invisily/linuxclient/client_data/log
```
