1 Introduction

This guide provides all the prerequisite knowledge and steps to install the Invisily Client on macOS desktops.

2 Requirements

Following are the hardware and software requirements:

2.1 Hardware

- Processor: Minimum 2+ GHz Dual Core x86
- Memory (RAM): 4 GB

2.2 Software

Supported Operating Systems:

- Catalina
- Big Sur
- Monterey
- Ventura

3 Install

1. Right click on the package “**invisily_client.pkg**” and select “**Open With**”. From the list, select “**Installer**” to proceed with the installation. Alternatively, double click on the package file.
2. Follow the installation wizard till the end and click “**Install**”.
3. On completion, a successful installation message will appear.

4 Run

1. From the **Applications** folder, double click on **Invisily** to run the Invisily Client. Alternatively, from the **Launchpad**, find and click on the **Invisily Client**.
2. Enter your credentials (username and password) and click on LOGIN.
3. On successful login, the list of the available/assigned services will appear.

5 Uninstall

1. Open a terminal.
2. Run the following command:

```
sudo /Library/Application\ Support/Invisily/uninstall_invisily
```

6 Troubleshoot

The log files are maintained at the following path:

```
/Library/Preferences/Invisily/Logs/
```
