1 Windows Client

This guide provides all the prerequisite knowledge and steps to install the Invisily Client on Windows devices.

1.1 Requirements

Following are the hardware and software requirements to run the Invisily Client:

1.1.1 Hardware

- Processor: Minimum 2+ GHz Dual-core x86
- Memory (RAM): 4 GB

1.1.2 Software

- Supported Operating Systems:
 - Windows 7 (32/64 bit)
 - Windows 10 (32/64 bit)
 - Windows Server 2012 (64 bit)

1.2 Prerequisites / Dependencies

1.2.1 Dot Net Framework

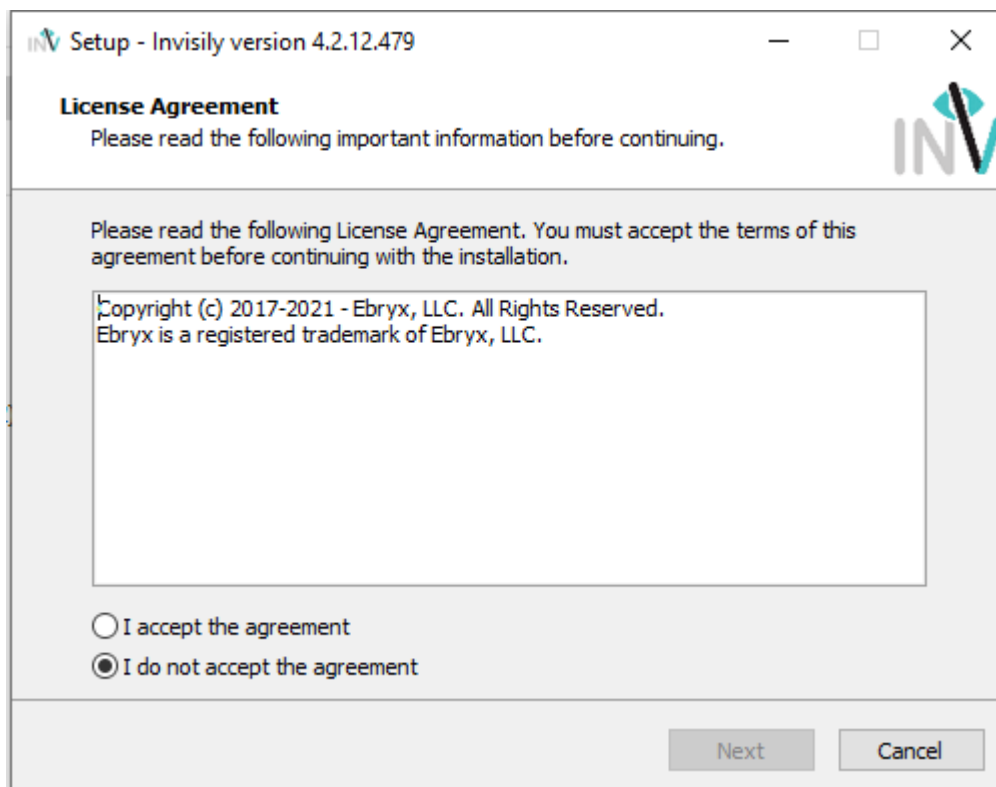

Invisily client requires Dot Net Framework Redistributable v4.6.1 for MFA related functionality. It can be downloaded from [here](#).

1.3 Install

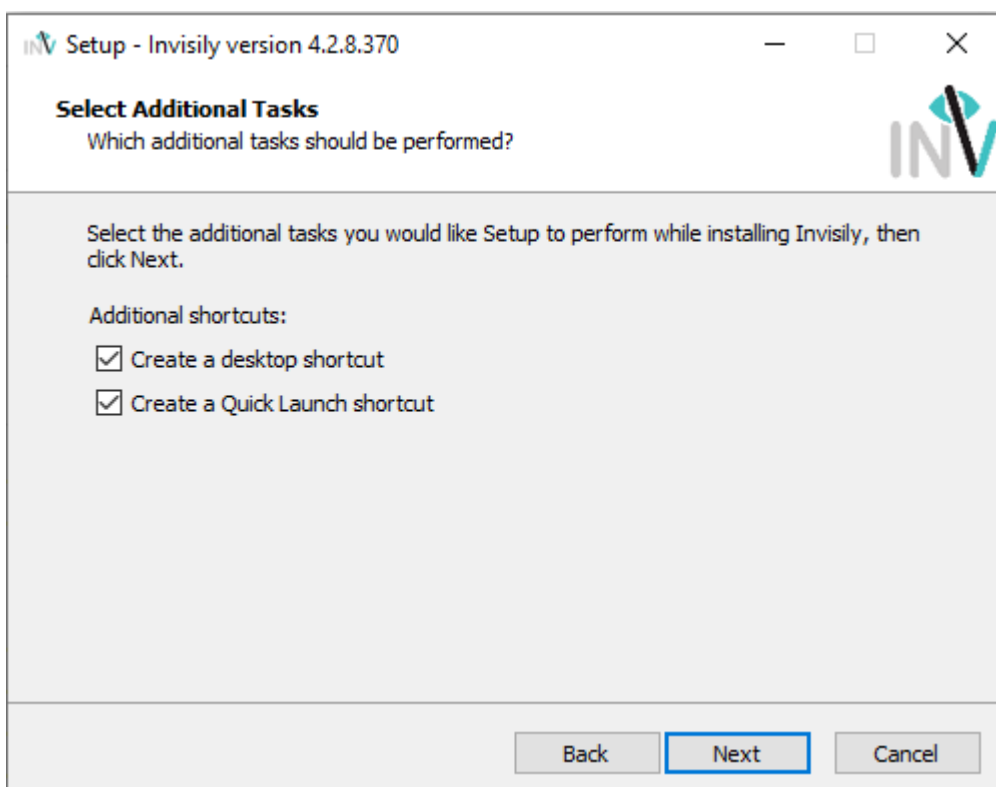

Download windows client installer from **Invisily Admin portal ➡ Software Management ➡ Software Updates** or request your IT admin to send you a download link through email.

1.3.1 Invisily Installation

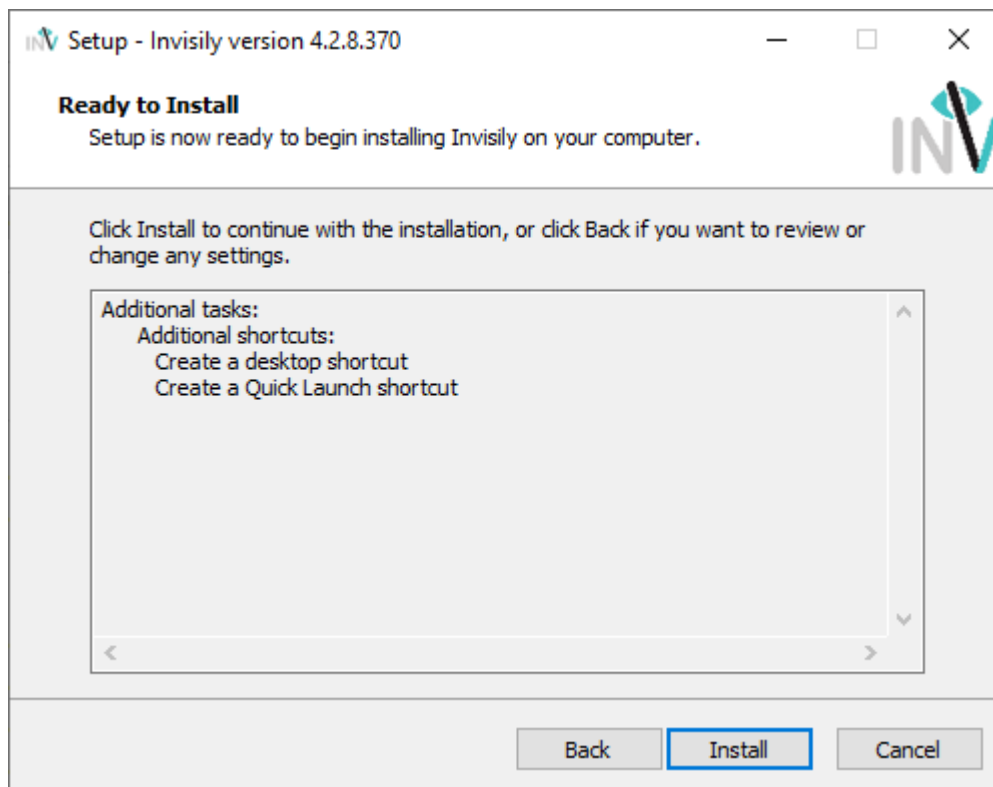

1. The downloaded file will be in compressed format (e.g. ZIP). The user needs to extract the installer from the compressed file. The installer (**invisily-client.exe**) can then be launched with admin privileges to start the installation process.
2. Right click on the installer. (Note: It is recommended that there will be only one instance of the Agent installed on one machine. Make sure that any previously installed instance is uninstalled before proceeding with the new installation.)
3. Select **Run as Administrator** option.
4. Click on **Yes** to confirm the admin rights. In some cases, the admin will be prompted for the password if it is protected by one.
5. The installation wizard will start, accept the license agreement and click **Next**.

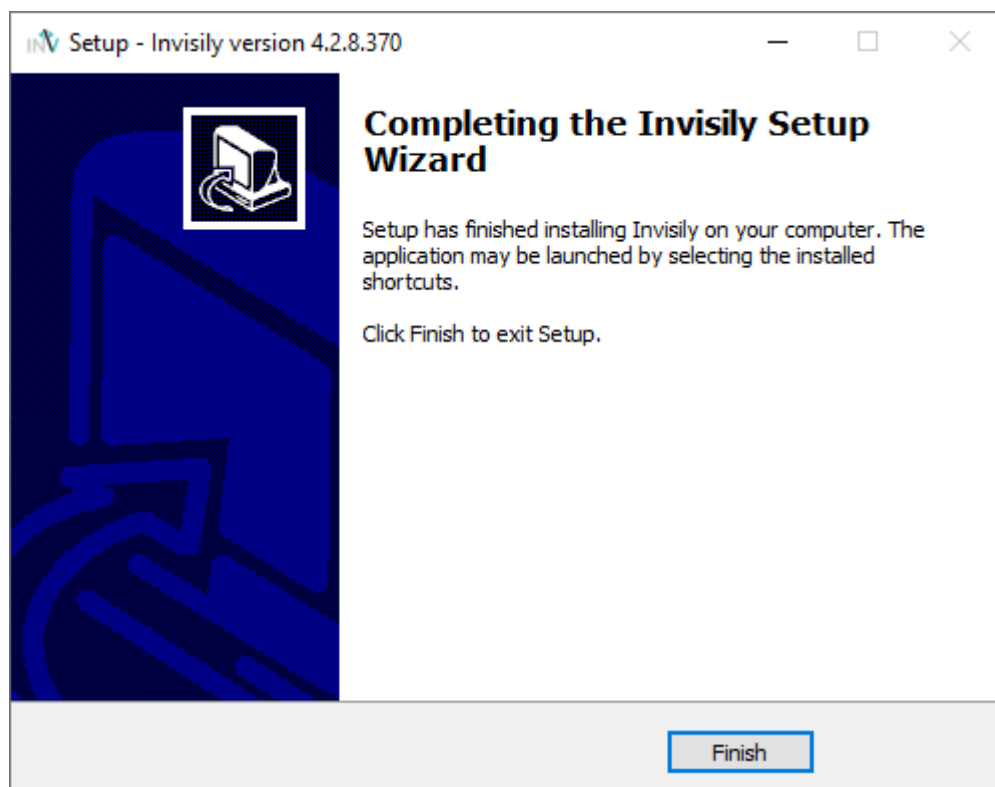

6. On the next screen, the **Invisily Client** will ask for additional tasks. Select the shortcut you need and click **Next**.

- On the next screen, Invisily component will be ready to install. Verify the additional task you selected before. Then, click **Next**.

- After the Installation step is complete, click **Finish**.

1.3.2 TAP-Invisily Installation

TAP-Invisily is another important component of Invisily. This driver is installed/uninstalled silently on your device. You can view it in the **Control Panel → Programs** view.

1.4 Run

1. Run 'Invisily Client' by shortcut from (Desktop or Start Menu).
2. Enter your credentials and click Login.
3. On successful login, the services list will be displayed.

1.5 Uninstall

1. Go to **Start menu → Invisily Uninstall**, right click on **Uninstall** and select **Run as Administrator** or go to the **Control Panel → Uninstall a program → Invisily Client → Uninstall**.
2. Popup notification will show up asking for the user to confirm **Uninstall**.
3. After complete **Uninstallation**, the user will be notified with another popup notification.
